JOB-TRAKER_{SM}

Today there is a revolution happening in business. The internet, long realized to be an asset to the marketing and sales organizations is now beginning to be used by all the other parts of the operation including the service and maintenance teams.

Up until now there has been a large investment and a continuing back office cost for a service organization to utilize this mature technology.That is no longer the case. We at Job-Traker have done all the development and stand ready to offer you a turnkey application that will bring your service organization into the "New Millennium" and give you all the benefits of just such a system for a small monthly fee. We do all the work, configure the system for you on a secure server that is monitored 24/7 and has redundant internet connections to assure that you are always connected and ready to do business.

Your service personnel only need a PC and internet access, usually a broadband connection. Using the browser on the PC, each user logs in to the server with their own account and password.Then they access screens, update information, complete predefined forms, and electronically deliver invoices to the desired recipients with a few mouse clicks. In the background, the system updates the databases, sends e-mail or text messages, generates logs and presents reports as required by your staff.

Our Promise to You….

Choosing a system to manage your business can be difficult. Different applications have varying qualifications, equipment needs, skill requirements, complexities, and yes, different pricing.

One thing for sure is that a good system will give you an insight into your business, be intuitive to use, require little training and work the way you need to run your business.
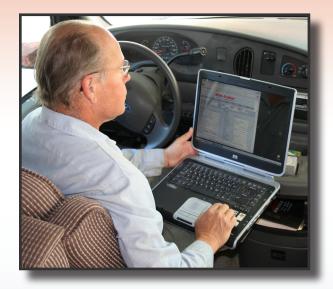

Job-Traker, which was designed to run a service business similar to yours, will more than satisfy these criteria and address many other areas which will help to streamline your processes, simplify and in many cases eliminate paperwork, and generally speed up your overall business operation. While doing this you will now have automatic process tracking in place to keep on top of all things related to the service business.

Service starts at less than 1/4 the monthly cost of a clerical staff person and can be tailored to work within your budget.

Sounds like exactly what you need to increase profits by avoiding untimely delays and scheduling conflicts - doesn't it. Call us now....
